

# Hydraulic Breaker

The hard hitting Thomas Hydraulic Breaker is the toughest most reliable breakers available. It's not often you hear the word breaker and reliability used in the same sentence but with only two moving parts long trouble free operation is built in.

The breakers internal hydraulic system is designed to pack a powerful punch without the need of high pressure accumulators. Its low pressure nitrogen "gas assist" cycle provides the firing power while protecting the loader from unnecessary vibration.

The breakers advanced hydraulic design also protects the loader from hydraulic surges eliminating the need of surge dampening accumulators in the system.

Available accessories include; Moil Point, Blunt Point, Chisel Point, Frost Wedge, Asphalt Cutter and Tamping Pad.

- **Energy Class** 100 ft.lb. (15 kg-m)
- **Blows Per Min. (adjustable)** 700—1300
- **Tool Dia.** 1.6" (40 mm)
