

# Pallet Fork

Thomas Pallet Forks are designed to make short work of all your palletized material handling chores. And, Thomas' exclusive self leveling boom arm system will turn you into a pro with no spill loading and unloading as you move materials around the jobsite.

Depending on your material handling needs you can choose between 32 or 42" (813 or 1067 mm) tine lengths. In addition the tines pivot which allows them to self level when operating on uneven terrain.

The pallet forks feature heavy duty frame construction and built-in spill guard which still allows clear see through visibility.

The pallet forks quick-tach mounting system ensures your ready to take on any job in seconds
