

Rock Bucket

Clearing rock and debris from the construction site has never been easier.

The Thomas Rock Bucket features heavy duty construction ensuring trouble free performance.

The buckets are built with a combination of 3/4" (19 mm) and rugged 1 1/8" (28 mm) diameter alloy steel tines . The bucket 2" (50 mm) spacing leaves the valuable top soil behind while removing rock and debris.

The Thomas' spill proof self leveling bucket system also ensure what you pick up stays in the bucket.
