

Angle Sweeper

Whether on the street, side walk or factory floor, Thomas Angle Sweepers are designed for quick efficient clean-up.

The hydraulically powered sweeper is designed to sweep flush to the curb and can be operated up to a maximum of 30° to the left or right.

The easily replaceable wafer bristle design features a full 24 inch diameter brush that can be ordered with a choice of poly, poly/wire or wire bristles.

Exclusive to Thomas, the loaders hydraulic circuit features a motor spool which protects the sweepers drive motor from hydraulic pressure spikes when the sweeper is shut off.

- **Width 51" (1295 mm)**
- **Sweeping Width 42" (1067 mm)**
- **Height 30" (762 mm)**
- **Maximum Sweeping Angle (left & right) 30°**
