

Tiller

The Thomas 48" Tiller is designed to tear through the toughest, most compact and hardened soil conditions with ease. The tiller will quickly and efficiently prepare the soil for planting.

The hardened, fully replaceable double edged tines can be operated in either direction increasing efficiency. The tiller is also equipped with adjustable depth guides to precisely control the tilling depth.

Thomas' exclusive hydraulic circuit motor spool feature protects the tillers drive motor from hydraulic pressure spikes when the tiller is shut off or the direction of rotation reversed.

Whether your breaking new ground or mixing in mulch, fertilizer, compost or manure the Thomas Tiller will save you time and money while getting the job done.
