

# Trencher

The Thomas Trencher is available in two models able to handle hydraulic flow capabilities of 6 to 10 gpm (23–38 lpm) or 10 to 16 gpm (38 -60 lpm).

Power is provided to the digging chain through a high torque planetary drive ensuring maximum performance in the toughest conditions.

A choice of 24 to 36 inch (610–914 mm) bar lengths and broad selection of chain widths and cutting tooth designs let you match the trencher to your trenching requirements.

The Trenchers quick-tach mounting system ensures your ready to take on any job in seconds

- **Quick-Tach Mounting System**
- **Planetary Drive System**
- **Choice of 24, 30 or 36 inch Boom & Crumber Arm Lengths**
- **Wide Choice of Cain Width and Tooth Design**
- **Approx. Weight 566 lbs (257 kg)**
