

Life is complicated enough, in particular during these tough economic times. We understand that your money needs to work harder for you. We know you expect your investment to last longer. And we realize you want to focus on the important things, and keep the rest SIMPLE. That's why we build our Thomas skid steers SIMPLE, because a SIMPLE machine translates into money in your pocket.

Simple least machine downtime
Simple lowest maintenance costs
Simple longest lasting machine

The simplicity of a Thomas means it virtually never breaks down. No electronics combined with the best brand-name components enables you to make money in the field rather than spend money in the shop.

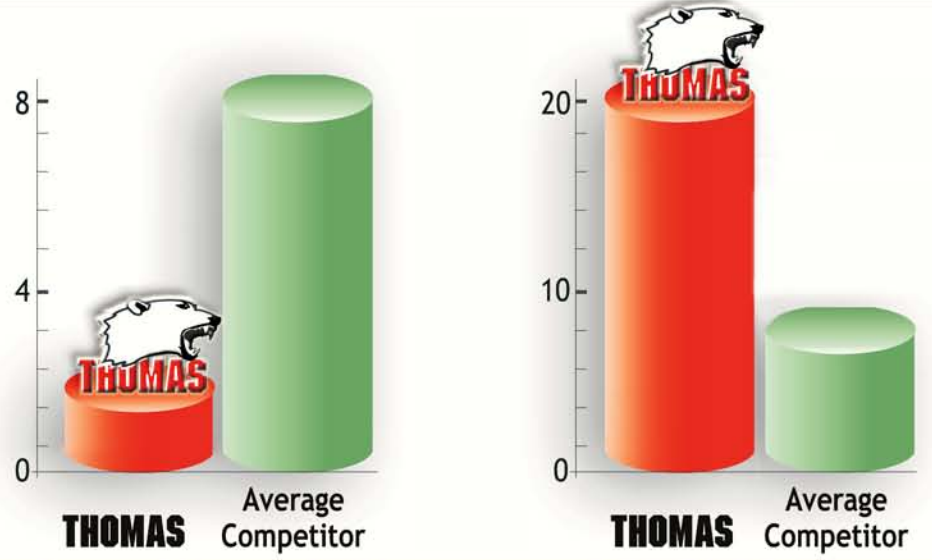

Simply built means the Thomas machine is simple to maintain and that translates into quick and inexpensive maintenance which costs less than any other machine.

Thomas is recognized as the machine that outlasts its competitors, bringing you value over many years, and a superior return on your investment.

Thomas vs. Competitors:

Downtime (days/year) Average lifetime (years)
